

THE ADSL NETCONNECT ADVANTAGE

NetAccess delivers business solutions in the rapidly developing Internet environment. ADSL NetConnect is designed to meet a wide range of customer needs from the small home office to large enterprise networks.

ADSL – short for Asymmetric Digital Subscriber Line – is a technology that allows high-speed data transfer rates over existing copper telephone lines. The service allows for Internet and voice communications on the same line at the same time so no extra phone line is required. Connection speeds range up to 4.0 Mbps and no additional data transfer charges apply. NetAccess provides the following ADSL NetConnect packages:

SOHO NETCONNECT

Internet connection suited to residential or home based business. From \$49.95/month.

Features:

- up to 4.0 Mbps connection on a residential phone line
- 3 email accounts

BUSINESS NETCONNECT

An economic solution for a small to medium sized company. From \$69.95/month.

Features:

- up to 4.0 Mbps connection on a business phone line
- 6 email accounts
