

THE NETBACKUP SERVICES

Backups are one of those tasks that everyone knows should be done regularly, but few take the time to do properly. In the event of data loss through human error, technical failure, theft, or some form of natural disaster, few businesses have the confidence that their critical data can be restored.

NetAccess understands the need of business to have secure and reliable access to critical business data at all times. With our NetBackup service we offer clients a comprehensive and scalable data protection service to minimize the risk of data loss and downtime.

NetBackup provides a simple and secure method to backup your important computer files to a remote site, and gives you the peace of mind to know your critical business files are secure.

NetBackup uses your existing Internet connection to maintain a copy of your important files at a remote location. Backups are easily accessible and can be scheduled to automatically run during off-hours. Sophisticated compression and encryption methods are used to provide fast and secure backups. NetBackup will enable you to easily recover from unexpected losses.

NetBackup offers a wide range of options to fit any size office, and gives the flexibility to mix-and-match packages. Choose one user package and one storage package, to suit your individual needs.

NETBACKUP USER PACKAGES

- From 1 user to 100 users
- From the simple home office to larger businesses
- Starting from \$4.95/month

NETBACKUP STORAGE PACKAGES

- From 100 MB to 100 GB
