

# THE NETCONNECT ADVANTAGE

For the small office, home office or corporate user, our NetConnect Advantage services give you the most in versatile, high quality and reliable Internet access that is designed to fit your changing needs. We are constantly investing in new technology to give you the performance you demand.

The NetConnect Advantage provides a wide range of connection options from basic modem dial-up to high-speed connections. All packages include Internet connectivity and email capability as well as access to over 30,000 newsgroups. NetAccess offers free consultations to assess the best options for Internet connectivity. The NetConnect Advantage gives you the service you need to stay ahead.

## DIALUP NETCONNECT

An Internet connection made using a modem and phone line. The modem dials a specific call-in number every time to make a connection. This service is most suited to customers who do not have access to high-speed solutions or to customers who only require periodic connections to the Internet. Speeds of up to 56 Kbps can be achieved. Unlimited and Canada-wide dial up services are also available.

## ADSL NETCONNECT

A high speed Internet connection that allows for Internet and voice communications on the same line at the same time, therefore no extra phone line is needed. Service offers high speed connections of up to 4.0 Mbps which is up to 50 times faster than dial up. The service is designed to meet a wide range of customer needs from the small home office to large enterprise networks. ADSL NetConnect provides great connection speeds at very reasonable rates.

## WIRELESS NETCONNECT

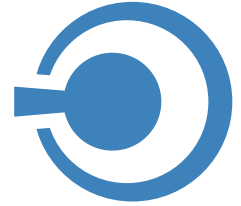

Delivers a high-speed wireless solution for business customers requiring an alternative to the conventional wire-based options. Wireless NetConnect is a full duplex (two way) connection allowing fast uploads AND downloads. Connections speeds vary between 1.5, 2.0 and 3.0 Mbps.

## FIBRE NETCONNECT

Provides you with a complete range of scalable dedicated access solutions that can grow with your rapidly expanding business needs. Whether it is a simple network connection, or a sophisticated VPN and e-business implementation, our Fibre NetConnect service will give you the reliability and performance you require to run your business on the Internet with complete confidence.

# THE DIALUP NETCONNECT ADVANTAGE

With Dialup NetConnect you can access the Internet at speeds of up to 56 Kbps anytime without the worry of busy signals. All packages offer Internet connection, email using either POP3 or IMAP, personal website capability and access to over 30,000 newsgroups. The dialup service can be set up over the phone and activated the day you call. Dialup NetConnect is a good option for those who are unable to obtain a high speed Internet connection.

## BASIC DIALUP NETCONNECT

One of NetAccess' original dialup packages. Is a great solution for residential or small business users who require light Internet usage. From \$24.95/month.

### Features:

- 120 hours of dialup time per month
- 1 email account
- 10 MB of disk space
- 20 MB of data transfer

## EXTENDED AREA NETCONNECT

This package is geared toward clients who require roaming Internet access from various centers throughout Canada or who require a large number of connectivity hours.

From \$29.95/month.

### Features:

- Unlimited hours
- 1 email account
- 10 MB of disk space
- 20 MB of data transfer

## BUSINESS DIALUP NETCONNECT

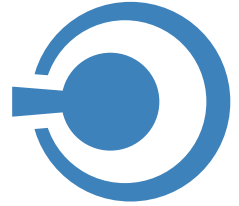

Package is designed for small businesses that need unlimited hours and extra email boxes for their staff. From \$39.95/month.

### Features:

- Unlimited hours
- 6 email accounts
- 30 MB of disk space
- 100 MB of data transfer

# THE ADSL NETCONNECT ADVANTAGE

NetAccess delivers business solutions in the rapidly developing Internet environment. ADSL NetConnect is designed to meet a wide range of customer needs from the small home office to large enterprise networks.

ADSL – short for Asymmetric Digital Subscriber Line – is a technology that allows high-speed data transfer rates over existing copper telephone lines. The service allows for Internet and voice communications on the same line at the same time so no extra phone line is required. Connection speeds range up to 4.0 Mbps and no additional data transfer charges apply. NetAccess provides the following ADSL NetConnect packages:

## SOHO NETCONNECT

Internet connection suited to residential or home based business. From \$49.95/month.

### Features:

- up to 4.0 Mbps connection on a residential phone line
- 3 email accounts

## BUSINESS NETCONNECT

An economic solution for a small to medium sized company. From \$69.95/month.

### Features:
